

ScreenLogic® Interface

For iPad®, iPhone® or iPod touch®

By Pentair Water Pool and Spa®

IntelliTouch® control from your iPad®, iPhone® or iPod touch®

Pick up your iPhone® and talk to your pool.

Now you can use your Apple® iPad®, iPhone® or iPod touch® to control all key functions of your pool or spa, from across the deck or around the globe. New software that communicates with the ScreenLogic® interface of your new or existing IntelliTouch® control system is now available as a *free download* from Apple's App Store®. Once it's installed, you can control everything from pool and spa temperatures, to jets, lighting, water features, remote video monitoring and more—right from your iPhone.

No other pool or spa control device offers such convenience. Imagine using your iPhone to:

- Easily turn on your spa and set it to the *perfect temperature* on your way home from work.
- Control all circuits when you are away—including waterfalls, pool lights, fountains and more.

- Use the History page to monitor temperature, pool/spa, heater and lights from afar.
- Remotely view *live video* on up to 4 video cameras around your property (with the optional Video & Lighting protocol adapter PN 520854Z).

On second thought, don't just imagine it. Take matters into your own hands...no matter where you are.

We've brought energy savings within easy reach.

The Eco Select™ brand designates eco-friendly products that conserve energy, minimize water usage, reduce noise or otherwise contribute to a more environmentally responsible pool system. As the global leader in pool and spa equipment manufacturing, we stand at the forefront in providing greener choices for our customers. We hope you'll join us in embracing more eco-friendly poolscapes by choosing Eco Select brand products like this one for your swimming pool.

ScreenLogic® Interface

For iPad®, iPhone® or iPod touch®

Fingertip convenience, worldwide control.

How can you manage your pool or spa with our iPhone® app? Just about any way you want—from just about anywhere.

Easy to navigate. To get started, just choose what you want to manage from a simple home screen like this one. Plus, you can even operate light switches for your house and yard by connecting them through a Universal Powerline Bus™ control system over your standard household wiring.

Temperature control for pool and spa. Getting off work an hour from now? Crank up the temperature on the spa, kick on the pool pump and even choose the heater mode: Off, Solar, Solar Preferred, or Heater. When you arrive, your place of relaxation will be waiting.

Like standing in front of the control panel. If you've set up Waterfall, Jets, and Spillway on your IntelliTouch® system, then those circuits—and any others you've similarly chosen—will show up on the Circuits screen of your iPhone app. Which means you enjoy push-button control anytime from anywhere.

Know what your pool's been doing. Your iPhone app shows you a visual history of your pool and spa's operation. See how your water temperatures have changed over time. Confirm the exact periods that the Lights, Heater, Solar, Spa, and Pool modes have been used. Know your wishes are being followed and your money is being saved—no guesswork necessary.

Video camera control. Don't worry about what's happening at your pool while you're away—just tune in. You can remotely control up to four cameras placed inside or outside your property. Log in from anywhere and watch live streaming video. Built-in motion detection can even email you pictures of unwelcome guests.

Here's all you need to do.

The software for your iPad®, iPhone® or iPod touch® is a free download from the Apple® App Store.® It's easy to get:

1. Using your iPhone, visit the App Store.
2. Search for "Pentair".
3. Choose to download and install Pentair ScreenLogic®.

If your pool is equipped with IntelliTouch automated controls and a ScreenLogic PC interface to access them, you're already good to go.

If you don't yet enjoy the benefits of IntelliTouch automation, now's the ideal time to upgrade to electronic convenience and get iPhone remote control at the same time. If you're an IntelliTouch owner, you can gain iPad, iPhone and iPod touch access through a ScreenLogic PC interface kit (Part # 520500). This kit lets you remotely manage your pool and spa through your PC as well as your iPhone. Best of all, right now Pentair Water Pool and Spa® is helping your pool professional bring it to you at substantial savings.
